Advance dental products carry our 100% no-questions-asked, money-back guarantee. We want you to be completely satisfied with your purchase of Advance dental products. If for any reason you are not completely satisfied with an Advance dental product, we will completely refund your purchase price.

Make gray go away.

6 Tips to Prevent Gray Market and Counterfeit Product Risks

1. Look carefully for authorized channels.

Only buy products from 3M authorized distribution channels. And always vet new dealers that solicit your practice.

2. Be wary of hard-to-reach businesses.

Avoid businesses that make it hard to talk to a real person or who are not upfront about how they can be contacted.

3. Distributor questions? Ask us.

If you have a question about whether a distributor is legitimate, please contact 3M directly and ask. Call 3M Customer Care at 800-634-2249 or check our website.

4. Avoid deals that are "too good to be true."

They usually are.

5. Train your staff to buy smart.

Train your staff to know who they are buying from, and to avoid compromising quality in their pursuit of cost reduction. Give them a list of your favorite brand's authorized distributors. Teach them to work with authorized distributors to find offers that work for your budget.

6. Keep the idea of cost reduction in perspective.

Saving on your supply expense is minor when you consider the value of your business and your reputation.

Quala[®] DISPOSABLE AIR/WATER SYRINGE TIPS NO ADAPTER REQUIRED!

FEATURED PRODUCTS

Riva Star Silver Diamine Fluoride Desensitizer

by SDI

Riva Star is a new-generation silver diamine fluoride desensitizer that immediately relieves tooth sensitivity. Unlike other silver fluoride systems, Riva Star's two step patented procedure minimizes the risk of staining. By applying the potassium iodide solution over the silver fluoride, a silver iodide creamy white precipitate is formed and washed off.

- » Indicated for desensitizing cervical tooth hypersensitivity, cavity cleansing and detecting caries
- » Assists in the elimination of biofilm
- » Inhibits biofilm formation
- » Non invasive; conditions dentine and may assist tooth preservation

Ryan Siler

Lead Installation Technician
Curtis Geist

Installation Technicians
Mark Mazurkewycz
Ray Browning
Troy Oliver
Brian Bogue

Senior Interior Designer
Inga Paul

In 2016, Dr. Eric Anderson bought two properties adjacent to his practice in Adel, Iowa. This purchase was part of a five-year plan to build a new practice in this location. Adel Dental Group is a satellite office for his main practice, Anderson Dental Group, which is in West Des Moines, Iowa. Before starting his ambitious long-term project, he knew he wanted to update the existing office and add an operator. That would hold Dr. Anderson over until the grand vision became reality.

BUILDING THEIR DREAM

In Fall 2016, Dr. Anderson and his wife Diana, who works as the Practice Manager, made the trek to the A-dec manufacturing and educational facility in Oregon. They were accompanied by Goetze Dental Sales Representative, Caleb Van Cleave and Equipment Specialist, Ryan Syler.

Dr. Anderson said of that trip,

“ I liked the experience of A-dec because you could touch and feel. You could sit in those operatories and see how different setups would work. A-dec and Goetze were very good at pointing out things that could be improved, from ergonomics to the flow of patient treatment to efficiencies and integrating technology.”

EXTERIOR

[Above] Adel Dental Group’s new building fits right into this historic neighborhood, thanks to its locally-sourced brick exterior and vintage-style lighting fixtures.

RECEPTION

(Left) Adel Dental Group's cozy reception area has the appeal of a ski lodge, making patients feel right at home.

(Right) The spacious reception and waiting area has a mix of neutral and warm tones to create a sense of calm.

The order was placed, but the equipment was not installed. It began to make more and more sense to move forward with the building project earlier than originally planned. Why update the office when they planned to move fairly soon, anyway?

PERFECT TIMING

The timing was right for other reasons. Another dental practice in town appeared to be operating at capacity and turning away patients. Dr. Anderson had the unique opportunity to move forward with his vision while better meeting the needs of the community.

The delay between the trip to A-dec and deciding to work with Goetze can be explained by loyalty. "Dr. Anderson is a really good clinician and he's really good to his team," remarked Ryan. "He's a loyal person, which is why he had a difficult time choosing Goetze instead of the supplier he uses for his main office in Des Moines. He's given us an opportunity to work with him at the Adel office, and we're very grateful for that." Adel Dental Group broke ground at the new location in May 2017, and the Goetze install began in December 2017 and wrapped up in January 2018.

A HUGE WIN

Dr. Anderson was very pleased with Goetze Dental's work. "Ryan did a fantastic job. He was very good about bringing things to our attention that we needed to think about. Ryan listened to my complaints about the old office, in terms of accessibility, ergonomics, and workflow, so he was a great advocate for our needs. It wasn't a cookie cutter process. And Caleb has been spending a lot of time with my team for a couple years to figure out their needs. He's just as much an advocate for the team as for the dentists. Caleb isn't afraid to go to bat for anyone. That can be kinda tricky, but he navigates that very well."

A-DEC 591 TREATMENT CONSOLE

The team of Adel Dental Group are happy with the addition of customizable productivity hub: an A-dec 591 treatment console.

OPERATORY

The operatories were designed to maximize accessibility, ergonomics, and workflow. This makes for a more comfortable experience for both doctor and patient.

That office is beautiful inside. The finishes, the operatories look amazing.

The doctors and their team love the new space, but what do their patients think? Dr. Anderson said, "We were a little concerned since it is such a dramatic change from our old office. Our old office was pretty dated, and one of our biggest concerns was that people would feel alienated or worried about costs. But people have just loved it and they're so happy."

This project was a huge win for Goetze. Caleb explains, "That office is beautiful inside. The finishes, the operatories look amazing. They built it to be prepared for the growth that is going to come." In fact, Adel Dental Group has already experienced growth. "Our new patient flow quadrupled in the first two months after opening," stated Dr. Anderson. "We already expanded our services to include an orthodontist (the only one in Adel) and another hygienist. The new space has five operatories with the option to expand to ten. We previously had only three."

ARTWORK DETAIL

The local story is shared along with the beautiful, detailed line drawing of the Dallas County Court House.

OPERATORY HALLWAY & ARTWORK

Adel Dental Group commissioned special artwork for the office that serves as both decoration and an illustrated history of the region.

SHARED VALUES

Both Dr. and Mrs. Anderson emphasize the importance of community and family in their business. They used local brick from Adel and the building has some of the same architectural features as the historical buildings in town. "The new office is beautiful and it fits in, which is why the community has so readily accepted it," explained Diana.

The people of Goetze Dental and Adel Dental Group have shared values. Both businesses believe in family, community, loyalty, and building relationships through good service and good work. This was ultimately why Adel Dental Group chose to work with Goetze Dental.

1

RECEPTION DESK

1) This reception area helps Adel Dental Group's front desk team easily manage patient flow from checkin to checkout.

BREAK ROOM

2) The team enjoys a private break room with a television, full kitchen, and comfortable seating.

2

3

COFFEE AREA

3) There is even a coffee nook in the waiting area, something Adel Dental Group's clients especially appreciate.

CHECK IN/OUT AREA

4) The checkout area of the reception desk creates privacy for patients and efficiently directs foot traffic.

4

STERILIZATION

5) A-dec's Preference ICC Sterilization System, designed to streamline the sterilization process for safety purposes, was a superb addition to the practice.

OFFICE

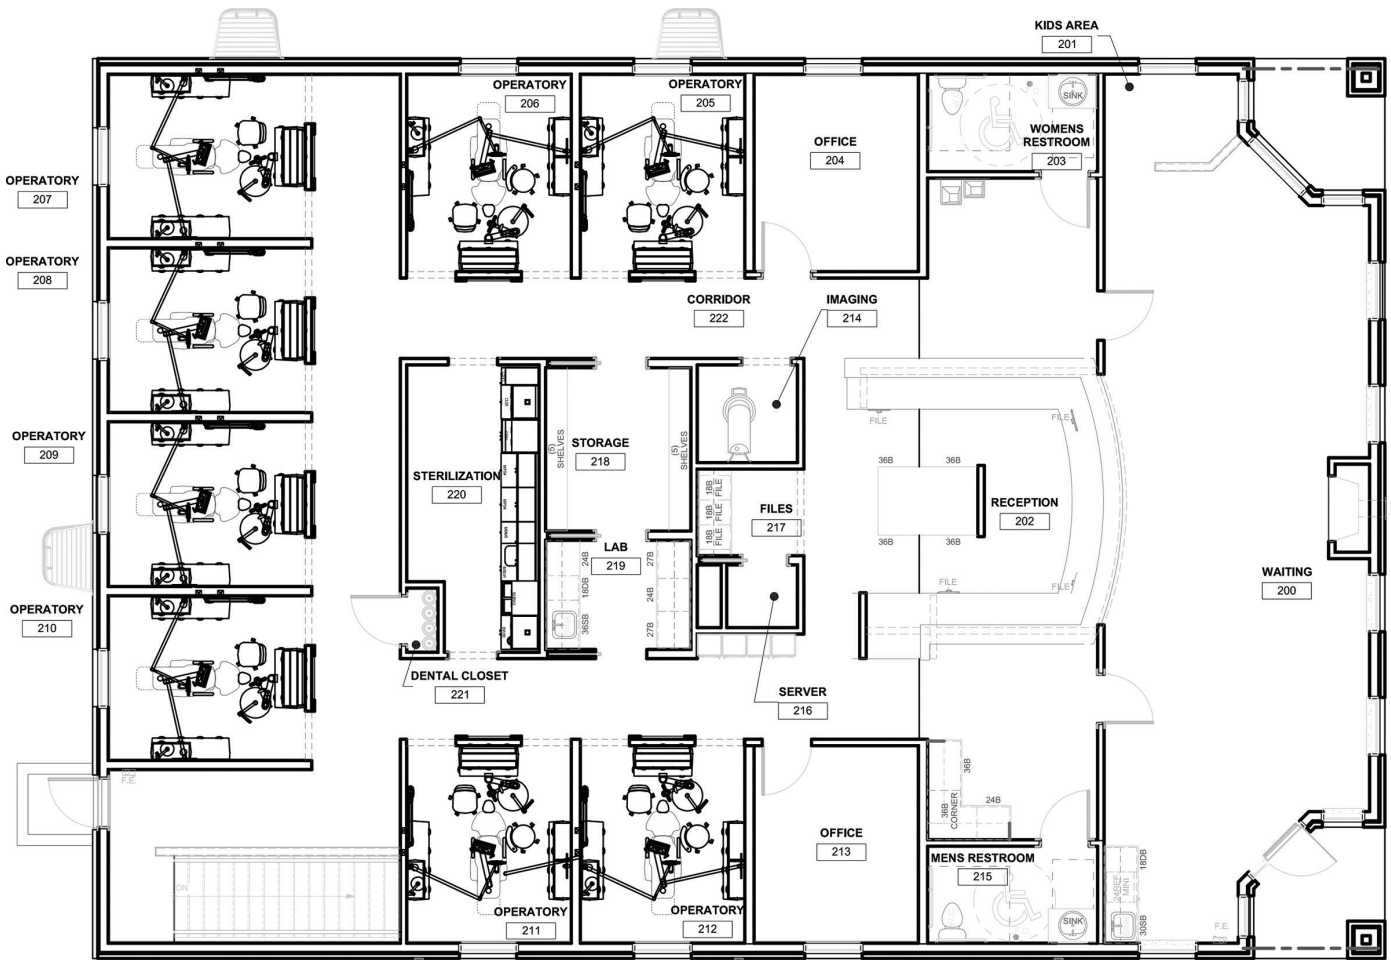

6) An office serves as home base for catching up on paperwork and managing the practice.

MI Varnish™

MI Varnish is ideal for all your patients at risk for caries. Fluoride is an important component in the fight against demineralization and caries. MI Varnish with RECALDENT™ (CPP-ACP) helps to make fluoride more bioavailable to gain that extra boost of protection from the calcium and phosphate.

Benefits of MI Varnish

- » Higher fluoride, calcium and phosphate ions released due to the RECALDENT™ (CPP-ACP) technology
- » Reduces sensitivity by sealing and penetrating dentinal tubules effectively blocking out external stimuli
- » Enhances acid resistance of enamel and promotes calcium and phosphate enriched saliva
- » Flows easily into interproximal areas, due to its low viscosity
- » Non-clumping white natural translucent shade
- » Excellent retention - stays on longer than the leading varnishes
- » Unique unit dose, easier to open, easy to access varnish
- » Generous volume per unit dose, enough for a full adult dentition
- » Does not immediately clump upon exposure to saliva allowing ease of use and longer working time
- » Greater fluoride contact time and increased calcium and phosphate bioavailability than gels, foams and varnishes
- » Stands out on tray, easy to identify - brightly colored unit dose

DESENSITIZERS

MI Paste™

Professionally specified tooth treatment delivering bio-available calcium and phosphate. Contains RECALDENT™ (CPP-ACP), MI Paste binds calcium and phosphate to tooth surfaces, plaque, and surrounding soft tissue. RECALDENT technology releases the calcium and phosphate when a patient's saliva is acid challenged by the normal digestive process. Indicated for post-bleaching sensitivity, root planning, and scaling, as well as during prophylaxis.

Oral-B®

CROSSACTION® Toothbrushes

After extensive engineering and research, the innovative Criss-Cross® bristles of the Oral-B CrossAction Toothbrush have been angled at 16° to optimize interproximal cleaning. The opposing bristles disrupt, lift, and sweep away plaque biofilm. CrossAction brushes remove significantly more whole mouth and approximal plaque vs Colgate® 360°.

217982 - CrossAction® PRO-HEALTH®, 35 Soft (Shown)

217981- CrossAction® PRO-HEALTH®, Gentle Clean, 35 Extra Soft

6 @ \$15.49

INDICATOR® Toothbrushes

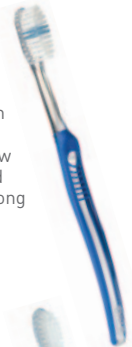

Oral-B® Indicator® Toothbrush

Innovative blue bristles on the Oral-B Indicator toothbrush inform patients when their brush has lost its optimum effectiveness, reminding them it's time to change their toothbrush. Studies show a new toothbrush can remove 30% more plaque vs a 3-month-old toothbrush.*1 Polished, end-rounded bristles effectively clean along the gumline. Oval brush head enables access to posterior teeth.

The Oral-B Indicator Sensitive Toothbrush has extra-soft bristles that provide a gentle, effective cleaning of sensitive teeth and gingiva.

218014 - Indicator® Sensitive,

35 Extra Soft (12/pk)..... \$13.99

Clinical Pro-Flex Toothbrushes

Bristles are embedded in two flexible "wings" that adjust to the contours of the mouth during brushing. Power Tip® bristles are gentle on enamel and effectively remove plaque. CrissCross® bristles are significantly more effective in penetration and cleaning per brush stroke. End-rounded bristles gently but effectively clear away plaque. Clinically proven to reduce gingivitis after just 4 weeks, while remaining gentle on enamel and gingiva. Assorted colors.

Contra Elite Extend Flex™

The NEW Contra Elite Extend Flex prophy angle features a cup that is 19% longer than the Elite and Elite Flex cups.* The latex-free, extra soft cup material increases flare and flexibility around the contours of the tooth. Outer spiral ridges are designed for better interproximal cleaning and splatter control.

Soft, pink:

556725 - 200/Box, 556726 - 1200/Box

Contra Elite Flex™

The NEW Contra Elite Flex prophy angle features a cup that is 25% softer than the Elite original.* The latex-free, extra soft cup material increases flare and flexibility around the contours of the tooth. Outer spiral ridges are designed for better interproximal cleaning and splatter control.

Soft, pink

556711 - 200/Box, 556714 - 1200/Box

Contra Elite Original™

The ridges on the inside and outside of this short cup are designed for better interproximal cleaning, exceptional stain removal, and improved splatter control. The Elite's design is also good for overlapped or crowded dentition. Clinicians have noticed access improvements on interproximal, subgingival, lingual, buccal and occlusal surfaces. Clinicians can use the outside of the cup to access lingual and buccal regions as well.

Soft, purple

216647 - 200/Box, 216648 - 1200/Box

Contra Disposable Petite Web™ LF

The purpose of the 4-webbed design is to improve stain and biofilm removal. The Petite Web has the greatest amount of flare, making it a natural choice for polishing at the gingival margin, buccal, lingual, and interproximal areas. The short cup makes it easier to access hard-to-reach areas.

Soft, purple

216701 - 200/Box, 216678 - 1200/Box

Contra Disposable™ Turbo Plus

This long cup was designed to provide the flexibility of the Turbo cup while also improving stain removal and paste retention with its webbing.

Soft, gray

216658 - 200/Box, 216718 - 1200/Box

Firm, white

216659 - 200/Box, 216719 - 1200/Box

200/BOX

1200/BOX
\$967.55

Classic Elite Flex™

The NEW Classic Elite Flex prophy angle features a cup that is 25% softer than the Elite original.* The latex-free, extra soft cup material increases flare and flexibility around the contours of the tooth. Outer spiral ridges are designed for better interproximal cleaning and splatter control.

Soft, pink

556713 - 200/Box, 556710 - 1200/Box

Classic Turbo™

Long cup allows for easier reach to molars. The curved rib interior design allows cup to flex and follow tooth contours, which makes it a good choice for polishing around gingival margins.

Soft, gray

216682 - 200/Box, 216656 - 1200/Box

Firm, white

216680 - 200/Box, 216657 - 1200/Box

Classic Traditional Web™

The purpose of the 4-webbed design is to improve stain and biofilm removal. This long cup delivers the most prophy paste to the tooth surface to increase the efficiency of the paste.

Soft, gray

216681 - 200/Box, 216679 - 1200/Box

Firm, white

216674 - 200/Box, 216655 - 1200/Box

Classic Elite Extend Flex™

The NEW Classic Elite Extend Flex prophy angle features a cup that is 19% longer than the Elite and Elite Flex cups.* The latex-free, extra soft cup material increases flare and flexibility around the contours of the tooth. Outer spiral ridges are designed for better interproximal cleaning and splatter control.

Soft, pink

556727 - 200/Box, 556728 - 1200/Box

Classic Traditional Web™ LF

The purpose of the 4-webbed design is to improve stain and biofilm removal. This long cup delivers the most prophy paste to the tooth surface to increase the efficiency of the paste.

Soft, purple

216702 - 200/Box, 216717 - 1200/Box

Classic Young Junior®

This medium sized cup is just right for most patients. It holds the same volume of paste as the long cups, which improves paste contact with the tooth surface. The Young Junior is a flexible cup that maintains fast, efficient cleaning while providing easy mobility in the mouth.

Soft, gray

216651 - 200/Box

Classic Elite Original™

The ridges on the inside and outside of this short cup are designed for better interproximal cleaning, exceptional stain removal, and improved splatter control. The Elite's design is also good for overlapped or crowded dentition. Clinicians have noticed access improvements on interproximal, subgingival, lingual, buccal and occlusal surfaces. Clinicians can use the outside of the cup to access lingual and buccal regions as well.

Soft, purple

216645 - 200/Box, 216646 - 1200/Box

Classic Petite Web™ LF

The purpose of the 4-webbed design is to improve stain and biofilm removal. The Petite Web has the greatest amount of flare, making it a natural choice for polishing at the gingival margin, buccal, lingual, and interproximal areas. The short cup makes it easier to access hard-to-reach areas.

Zooby™ Prophy Paste

Zooby Prophy Paste features an optimal formulation of abrasives and adhesive properties designed for low splatter and great stain removal. Zooby paste contains xylitol and 1.23% fluoride! The Zooby Prophy Paste line includes six delicious gluten-free flavors available in fine, medium and coarse grits, which can be purchased separately or in an assortment pack. Every bag of paste contains a special autoclavable Zooby Animal prophy paste gripper with a wide base, which allows the clinician to hold the paste cup with ease. The animal grips include a Turtle, Hippo and Gator. 100 per bag.

Cam-X Spectra Caries Detection Aid

Cam-X Spectra is the only caries detection aid that works like Doppler radar to discover caries earlier

NEW sleek design features a 120 degree button ring for added comfort

Early detection means pinpointing problems at an earlier stage, which traditionally go undetected. This leads to more conservation and less excavation

Spectra uses fluorescence to detect caries in fissures and smooth surfaces that may go unnoticed in X-ray images

Caries Detection images reimbursement is recognized more and more by insurance companies. Use these three NEW CDT codes, available and related to Caries Risk Assessment and Documentation for Low, Moderate, and High Risk: D0601, D0602 and D0603.

Cariou regions appear red, while healthy enamel appears green

After capturing the image within your existing imaging software, the extent of the decay will be interpolated and indicated in two ways:

1. The color will be either blue, red, orange or yellow
2. A numerical indicator between 0 and 5 will be shown

559247 - Cam-X Spectra Caries Detection Aid

Diagnodent Pen

The DIAGNOdent pen is a hand-held laser caries detection aid that provides the same high detection accuracy as the DIAGNOdent.

The DIAGNOdent laser caries detection aid removes the doubt from treatment decisions regarding hidden caries or questionable stained grooves. The device's ability to see into occlusal pits and fissures enables dentists to treat sub-surface caries lesions with confidence.

Benefits to you, your hygienist and your patients

- » Accurate: Over 90% accurate in detecting lesions not detectable with an explorer or bitewing X-rays.
- » Conservative: Prevents exploratory excavation or under-treatment of suspect teeth.
- » Quantifiable: Precise, reliable measurement allows objective monitoring of caries activity over time.
- » Confidence builder: Allows dentists and hygienists to treat questionable sites and su-surface caries with confidence.
- » Empowering: Allows hygienists to educate patients on caries disease process.
- » Marketing tool: High patient acceptance, great for marketing your practice and treatment philosophies. Interactivity engages patients in examination process.
- » Easy to use: Compact, portable device with user-friendly design.
- » Safe: Uses light energy-no X-ray exposure. Poses no danger to staff and patients. Painless, non-invasive examination by patients.

SoproLife

A revolutionary new device used for the diagnosis and treatment aid of caries based on the principle of fluorescence.

It's an Intra-Oral Camera

Daylight Mode - As an intra oral camera SoproLife provides clear and crisp images in each of it's 3 preset positions:

- » Macro: 0-5 mm
- » Intra Oral: 5-30 mm
- » Portrait: 30 mm +

It's a Caries Detection Device

Diagnosis Mode - SoproLife provides better detection of decays than any other available device.

Treatment Mode - Images produced in the treatment mode show a differentiation of healthy tissue versus diseased tissue.

250029 - SoproLife

SoproCare

The "SOPROCARE" concept was developed to assist the dental professional during prophylaxis and periodontal treatment in the dental office.

The camera utilizes unique fluorescence technology (SO-PRO patent* - 2003) to illuminate dental tissue to reveal caries in CARIO mode, as well as new and old dental plaque in PERIO mode.

In addition, SOPROCARE is the first product on the market to reveal gingival inflammation, in PERIO mode too.

In Daylight Mode, SOPROCARE can also be used as a camera, providing all of the necessary tools to perform a complete and time efficient oral examination.

The dental professional can now achieve complete prophylactic treatment with one device.

SWERV3 Ultrasonic Scaler

In light of advances in ultrasonic technology, power scaling instruments are now indicated for the removal of all types of deposits and biofilm, and should be considered to have a primary role in periodontal debridement. The new Hu-Friedy SWERV3 magnetostrictive power scaler offers finely tuned electronics, delivers a full range of power for superior efficacy, provides unrivaled patient comfort, and enables superior clinician comfort. SWERV3 is also compatible with the inserts produced by all major magnetostrictive scaling unit manufacturers.

551279 **\$2820.95**

Buy 1 SWERV3 Ultrasonic Scaler, Get 5 Inserts FREE!

BioSonic US100R

Advanced Ultrasonic Scaling System

- » BioSonic magnetostrictive Ultrasonic Scaler System accommodates both 25 kHz or 30 kHz inserts
- » Lower power range keep's patient's comfort in mind
- » Ergonomic handpiece improves operator's comfort during extended scaling
- » Small footprint minimizes counter space requirements
- » BioSonic Inserts - variety of most popular tip designs in both 25 kHz and 30 kHz
- » Multi-directional foot pedal for easy operation

258617 **\$1225.09**

Cavitron® Focused Spray® Slimline® 1000

Focused Spray® Slimline® 1000 uniquely combines a slim tip with a triple-bend design and beveled edge for:

- » Better adaptation around line angles
 - » Improved subgingival access
- Cavitron® FSI® Slimline® Inserts are designed to achieve highly efficient but gentle subgingival ultrasonic instrumentation. Being almost as slim as a periodontal probe, Cavitron® FSI® Slimline® Inserts can access even deep pockets as well as the tooth's furcation. The instruments adapt to the natural root's surface in every quadrant to ensure a highly efficient, non-cutting treatment. The "Focused Spray"-technology provides reliable lavage even in deep pockets and reduces aerosol at the same time.

553361 - 30K Triple Bend

Cavitron THINsert® ultrasonic insert

DENTSPLY's Cavitron THINsert is designed to facilitate debridement in difficult-to-reach areas, such as interproximal surfaces, concavities, and areas with tight tissue attachment—all without sacrificing tactile sensation. THINsert is designed to work with any 30k Cavitron ultrasonic scaler.

- » 47% thinner than FSI® Slimline® Insert
- » Can be used up to high power

251521 - 30K

FSI® Slimline® Insert (FSI® SLI™) Series

- » For fine, definitive debridement scaling.
- » Patented Focused Spray water delivery system eliminates external water tube, increases clinical visibility.
- » Extra-thin design provides maximum subgingival access.
- » Enhanced water management increases patient comfort.
- » Straight, right, and left configurations for more clinical utility and adaptation.
- » The FSI® Slimline® Straight should be used for preventive care, deplaquing, gingivitis patients, and patients with minimal bone loss.
- » The FSI® Slimline® Right and Left inserts are designed as a complementary pair. They provide maximum access and superior adaptation to root anatomy, including concavities and furcations. These inserts should be used for periodontal debridement and patients with bone loss.

Proxeo Handpiece

Unmatched prophy-paste application
Proxeo's advanced engineering makes splatter-back a thing of the past. Step on the foot control and let your Proxeo solution perform at the right speed all the time.

Patients will notice, too
What vibration? The quiet hum of Proxeo's low-speed motor has a way of adding calm to the patient experience. Plus, the operator feels less vibration as well reducing fatigue.

More attachments, greater options
With Proxeo's ISO-standard E-style connection, your team is able to accommodate virtually any electric or air motor. Go ahead, move the handpiece to the treatment room, rather than the other way around.

One-piece, unitized design
The lightweight one-piece design includes an integrated air motor and smooth ball-bearing pivot connector. For the operator, it means easy maintenance, nominal pressure, and less fatigue.

Snap-on design adds versatility and ease
Replacing cups and brushes is a snap. Proxeo's unique headadapter design not only accommodates a full range of cups and brushes, but making the switch is quick, safe, and easy.

556425 \$695.00

Nupro Freedom™ Cordless Prophy System with SmartMode™ Technology Handpiece

by Dentsply Sirona

Experience complete control in the palm of your hand.

Nupro Freedom™ Cordless Prophy System provides enhanced control, comfort and freedom. SmartMode™ Technology provides the latest advance in handpiece speed control, without the need for buttons or foot pedals.

The electric motor and high quality Nupro Freedom® Disposable Prophy Angles reduce noise and vibration, providing a more pleasant polishing experience for both the patient and the clinician. And, there is no need to sacrifice speed, torque or power – Nupro Freedom provides 25% more speed and power than previous Freedom models.

Additionally, Nupro Freedom Handpieces have a sterilizable outer sheath and are fully compliant with the CDC Sterilization Guidelines.

 PERFECTPEARL PROPHY ANGLES FREE!**

PROPHYflex® 3

Easy and efficient treatment. PROPHYflex simplifies your work. Just use the foot control of your existing treatment centre, for simple operation. This way you may also comfortably perform several prophylaxis sessions in a row. You will achieve perfect results – easily, rapidly and reliably.

Higher performance for perfect results.
 The cannula of the PROPHYflex is cleverly constructed, so that the powder jet is effectively and efficiently concentrated. The gripping sleeve rotates through 360° and grants excellent cleaning results – even in hard-to-access areas. You and your patients will benefit from easier treatment and shorter treatment times.

More time from easier cleaning.
 PROPHYflex will permit very fast and excellent cleaning results, for you and your chairside assistant. Moreover, handling of your PROPHYflex also saves time: reloading of powder or pearls, as well as cleaning of the device, is quickly accomplished in the “twinkling of an eye”. You will therefore save valuable time with each prophylactic session – every day!

How the best perform

Hu-Friedy AIR-FLOW Handy 3.0 Portable Units

The AIR-FLOW handy 3.0 portable air polishing units enable dental practitioners to efficiently, safely, and comfortably perform air polishing treatments in any operator. Simply connect the AIR-FLOW handy 3.0 device to your dental unit for a simple, convenient air polishing experience.

AIR-FLOW Handy 3.0

- » Use for supragingival applications
- » Lightweight device allows for optimal clinician comfort
- » Slim handpiece is easy to grip and rotate

AIR-FLOW Handy 3.0 Perio

- » Specially created for subgingival applications
- » Perio handpiece with Perio-Flow nozzles remove subgingival biofilm in pockets up to 5mm deep
- » Same great design and features as the standard handy 3.0

Call your Goetze Dental Sales Representative for pricing and information.

Titan® 3 Motor

- » System Flexibility - 100 - 5,000 or 100-20,000 rpm (depending on motor) speed range capability, requiring only a minimum of attachments to meet a variety of procedural needs.
- » Chairside Repairable Angles - Minimizes operator downtime and reduces costs relative to other handpieces.
- » LubeFree Motor, Straight Nose Cone, Motor-to-Angle Adapter and Torque Multiplier - Reduces maintenance time and the high cost of repeated lubrication.
- » 360° Quick Connect Swivel - Reduces tubing drag for optimum operator comfort, and enables quick disconnection of the handpiece for sterilization.
- » Better Performance Under Load (Torque) - Less likely to stall under higher torque requirements than other low speed motors.
- » Autoclavable - Safeguards operator and patient from cross-contamination.

- 258155 - 5K Motor without swivel \$944.44
- 258148 - 20K Motor without swivel \$827.38

ProphyStar® 3

Encore® D/C MiniMix®

Our Dual-Cure Core Buildup Composite Makes Core Buildup Easier and Better.

Encore D/C enables you to build up just the coronal core or to fabricate a composite post and core that bonds the post, tooth and core together into an integrated whole. The non-slumping formula eliminates the need to use a matrix/core-form. Light-activated to accelerate the set. Encore D/C MiniMix is our most popular format, the MiniMix .5mL unit-dose technology eliminates waste and cross-contamination concerns.

BUY 4 GET 1 FREE! 36-ct., contrast or natural.

DENTAL ADVISOR TOP AWARD: **FLUORIDE VARNISH**

Award-Winning Fluoride Varnish Year After Year

FluoroDose® goes on smooth, not sticky, so there is no “wooly” feeling. Our exclusive LolliPack® packaging makes FluoroDose the easiest varnish to apply while providing the maximum fluoride uptake. And, it dries when in contact with saliva – no need to worry about “dry fields” or “moisture control!”

FluoroDose®
5% Sodium Fluoride Varnish with Xylitol

BUY 4 GET 1 FREE! 120-ct., all flavors.

To redeem your no charge goods, email your qualifying Goetze invoice dated 7/1/18 - 9/30/18 to csorders@centrixdental.com. Invoices must be received by 10/31/2018. Offer valid in U.S. only. Cannot be combined with any other offers.

Nupro® White Varnish

A sweet new take on rapid fluoride release.²

- Uniquely formulated for hypersensitivity relief
- 2 hour wear time, so patients can quickly resume eating and drinking
- Releases more than 7 times the amount of fluoride than Vanish™ 5% Sodium Fluoride Varnish over a 2-hour period¹
- Designed to be applied to wet tooth surface and formulated for no dripping or stringing to reduce potential mess
- White varnish is easy to see during application and sets to a clear finish
- Gluten, SLS, and dye free
- Now available in caramel, grape, raspberry, bubble gum, and mint flavors

Buy 3 boxes of Nupro® White Varnish (any dose size), **Get 1 box Free!**

100/Bag	Each
SAFE-FLO® Saliva Ejector, White	575782 \$42.30

Studies show that backflow in low-volume suction lines can occur in **1 out of every 5 patients.**¹

SAFE-FLO® products provide backflow protection to keep your patients safe from evacuation line cross-contamination.

Unique one-way valve provides a barrier that prevents backflow.

1. Miller C. 'Back flow' in low-volume suction lines may lead to potential cross-contamination. RDH. 1996;16(1):30.

Most implants are all the same. Until now.

AnyRidge[®] IMPLANT SYSTEM

AnyRidge[®] Implants deliver better outcomes faster, along with significantly improved chairside production and patient satisfaction. Once dentists try AnyRidge, they never go back. Here are the reasons why.

- 1 The patented knife-thread design and XPEED[®] surface treatment allow you to load and finish faster.
- 2 You can match the thread diameter to bone density for maximum stability.
- 3 AnyRidge procedures require fewer office visits so you can perform more cases.
- 4 AnyRidge has 10 diameters and a single connection, which means less inventory and easier procedures.
- 5 AnyRidge preserves cortical bone.
- 6 The biological s-line curve design provides amazing esthetic results.
- 7 The unique 5-degree morse taper prevents screw loosening.

Intelligent.
Intuitive.
Powerful.

Welcome to EDDSON™ dental practice management software. The first software of its kind to be designed and built specifically around the user experience.

EDDSON's innovative design delivers unique capabilities to more effectively and efficiently manage and meet the demands of the busy dental office.

Intelligent

EDDSON was conceived and designed by actual dental professionals with years of in-office clinical and administrative experience. We believe you'll see the difference.

Intuitive

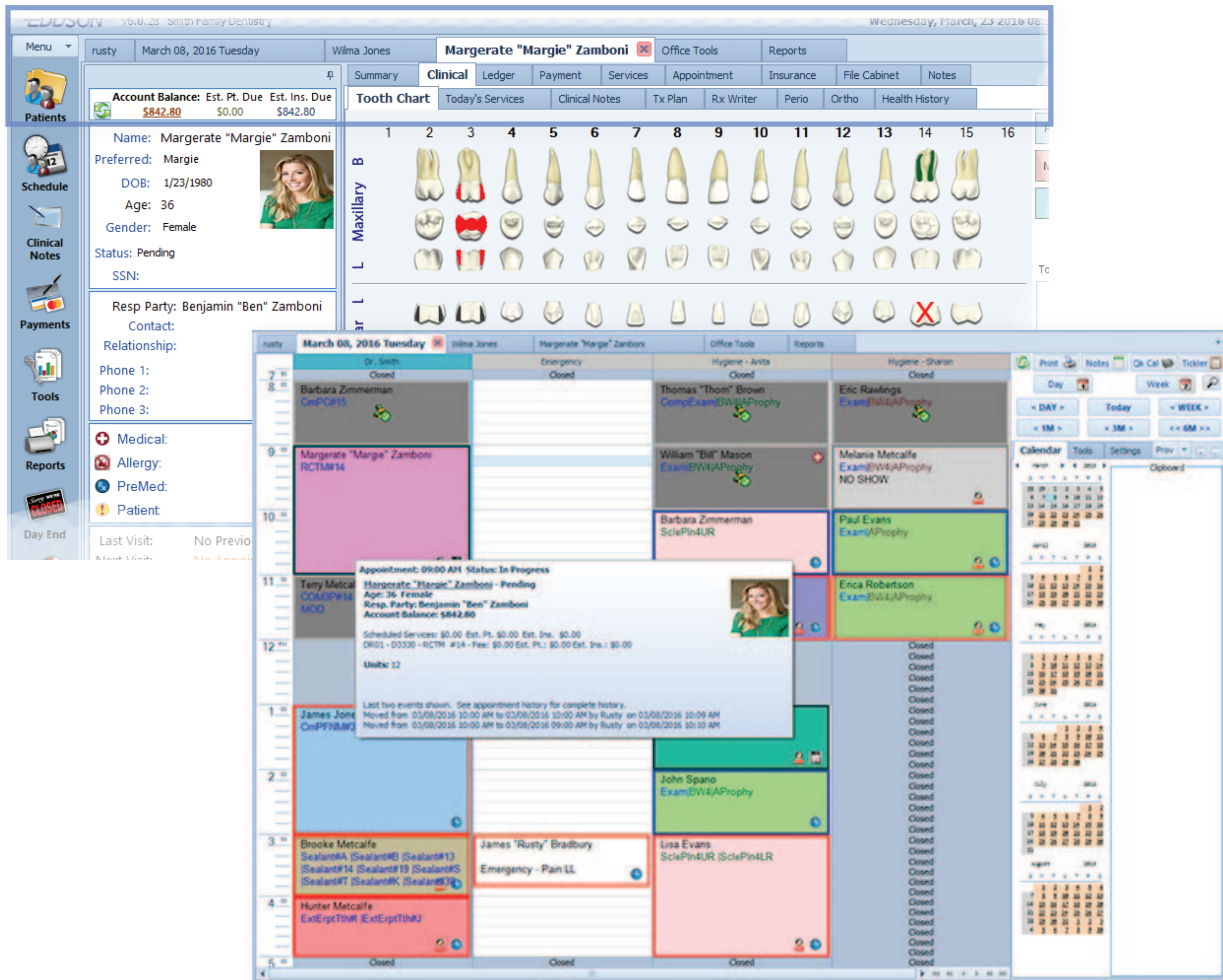

EDDSON's innovative user interface delivers unparalleled ease of use and work flow management. Set up a demo and see it for yourself.

Powerful

Interactive tools for Receivables, Treatment, and Claims management provide functionality and capabilities beyond the simple reporting of other leading applications.

Innovative Tab Based User Interface

- The EDDSON tab-based interface is the key to this design and provides unparalleled functionality while maintaining an easy-to-use environment.
- Unlike the leading PM applications, EDDSON™ users are not committed to "active" windows that must be constantly managed (closed or minimized) before new tasks can be started. Managing multiple tasks and functions in EDDSON is as easy as a single click. EDDSON users can manage up to 7 ongoing patient charts, tasks, or other functions.

The screenshot displays three overlapping windows from the EDDSON software interface:

- Account Balance Details:** A table listing service items with columns for Service Date, Prov, Patient, Tth Code, Description, Surf, Fee, Est. Ins Discount, Allowed, Ins Paid To Date, Pt Print/Credits To Date, Current Balance, Ins Due, and Pt Due. Totals show 842.80 in open items and a current balance of 842.80.
- Event Ledger:** A table showing ledger entries with columns for Date, Patient, Description, Debit, Credit, and Balance. It includes entries for posted services, patient payments, and insurance generated electronic DOS.
- Accounts Receivable Report:** A report for March 20, 2016, for Smith Family Dentistry. It includes a patient status section and a balance aging table.

Intelligent Design & Unparalleled Usability

EDDSON™ is equipped with many unique features and tools including advanced appointment scheduling, insurance coverage management and benefit tracking.

Features like our Treatment Quick Entry, Data Hot Links, and Smart Searches make using EDDSON faster and easier than competitive applications.

Powerful Accounting and Reporting

EDDSON™ is designed to provide a solid and secure accounting foundation while offering the administrative flexibility to manage the numerous dental account ledger issues that will inevitably occur from time to time.

Our unique “Event Based” ledger system presents a more organized and efficient approach to account management and instant access to additional information like payment distribution and insurance EOB details.

The “End of Day” accounting feature not only provides concise and straight forward reporting but also offers the security of daily cycle balancing and record protection that help to deter errors and/or fraud.

What Some of Our Users Say

“ I’ve worked as an administrator in dental offices for more than 10 years using the mainstream dental applications. I have to say that EDDSON is top notch and just keeps getting better.”

Tiffanie
Office Administrator
Olathe, KS

“ EDDSON is the most user friendly software we’ve ever used. It’s easy to navigate and offers many advanced features for scheduling, accounting, and reporting that are needed for a large practice like ours.”

Sam H., DDS
Kansas City, MO

“ Now I know just how bad my old software really was. EDDSON and the EDDSON team get it. I’m really glad we switched.”

Julie H., DDS
Aurora, CO

“ EDDSON’s accounting and administrative capabilities, particularly insurance management, are far superior to all the other PM applications I have used – and the support is great.”

Jodee
Office Administrator
Lenexa, KS

“ Frankly we didn’t know just how behind the times we were - especially from an accounting perspective. EDDSON has dramatically improved our ability to manage our patients as well as our practice. EDDSON’s improved functionality and its associated support (the staff loves the real time help desk technology) has been a game changer for our busy office.”

William K., DDS
Shawnee Mission, KS
