SPIRIT 1700
DENTAL CHAIR

Pelton & Crane™
Your Image Reflected.

Introducing the SPIRIT 1700 CHAIR

The Spirit 1700 dental chair combines innovative technology with quality components resulting in an easy to use, durable dental chair. Standard features such as embossed membrane touchpads for the doctor and assistant, a dual articulating headrest and swing away armrests coupled with the Spirit 1700's powerful hydraulic lift mechanism provide a quality seating experience.

Pelton & Crane offers an extensive selection of dental delivery units for various styles. Pelton & Crane's chair mounted delivery systems facilitate a balanced, ergonomic design and allow integration of today's modern dental equipment. Upgrade your operatory with the full line of Pelton & Crane LED lights. The Helios collection of operatory light offers superior illumination and decreased operating costs compared to traditional halogen lights. See better with the Helios.

Narrow back design without slings
Optional accessories shown

The Narrow Back

ADVANTAGE™

The Spirit 1700 chair compliments the Narrow Back Advantage. The chair's narrow back rest allows the clinician to reach the optimal ergonomic position, and enables the doctor to work around the chair, not trapped underneath it.

IMPROVED ERGONOMIC ACCESS

The Spirit 1700's new ability to reach a lower minimum height enables positioning flexibility for practitioners of any stature. Easily adjust the chair position so both you and your patients are comfortable.

UPHOLSTERY CHOICES

The 1700 chair offers a wide variety of upholstery options, including wide and narrow back, slings, colors, and exciting upholstery upgrades. The Plush Upholstery Upgrade includes Ultraleather and memory foam for a comfortable patient experience.

TECHNOLOGY INTEGRATION

With access to the innovative series of Helios LED lights and KaVo Electric motors, the 1700 package can meet a wide variety of clinician's needs. Bring updated technology and equipment to your practice.
